4 Trends to Try Before Summer's End

Summer's flying by, and before you know it we'll be wrapped in our favorite knits wearing our signature **smoky eye** once again. Before you go back to your staple makeup and enjoy humidity-free nights, take advantage of one of these hot **makeup trends for summer**.

Bright Eyes

Bright shades are in this summer. Expect to see lots of greens, blues, and purples on lids, says Landy Dean, a New York-based makeup artist. Use bright **eyeliner** paired with a matching eye shadow like Jessica Alba's teal version. Skip the **mascara** and lower lash liner for a more modern vibe. Just make sure you go easy on the rest of your face for a look that will really pop.

Try LA Splash Diamond Dust in Rich for a cool, edgy color for your eyes.
